## **WTO TBT Standards Code Directory**

Standardizing bodies having  
accepted the WTO TBT Code  
of Good Practice for the  
Preparation, Adoption and  
Application of Standards

---

**Update 2005-03-01**

---

---

ISO (International Organization for Standardization) and IEC (International Electrotechnical Commission) are non-governmental organizations that form a specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work.

WTO (World Trade Organization) is the legal and institutional foundation of the multilateral trading system. It provides contractual obligations determining how governments frame and implement domestic trade legislation and regulations for

their trade in goods and services. The WTO also administers an agreement concerning the trade-related aspects of intellectual property rights. The WTO serves as the platform in which trade relations among countries evolve through collective debate, negotiation and adjudication. Its four main responsibilities include: administering and implementing the multilateral and plurilateral trade agreements which together make up the WTO; acting as a forum for multilateral trade negotiations; resolving trade disputes between member governments and cooperating with other international institutions involved in global economic policy making.

The purpose of this Directory is to give systematized information on standardizing bodies having accepted the WTO TBT Code of Good Practice for the preparation, adoption and application of standards.

## Foreword

The World Trade Organization was established on 1 January 1995. As of 1 January 2005, there were 148 Members (central governments). The Agreement on Technical Barriers to Trade is one of the 29 individual legal texts of the WTO Agreement which obliges Members to ensure that technical regulations, voluntary standards and conformity assessment procedures do not create unnecessary obstacles to trade. Annex 3 of the TBT Agreement is the *Code of Good Practice for the Preparation, Adoption and Application of Standards*. In accepting the TBT Agreement, WTO Members agree to ensure that their central government standardizing bodies accept and comply with this Code of Good Practice and agree also to take reasonable measures to ensure that local government, non-governmental and regional standardizing bodies do the same (for the definition of “standardizing bodies” see ISO/IEC Guide 2). The Code is therefore open to acceptance by all such bodies.

The TBT Agreement recognizes the important contribution that international standards and conformity assessment systems can make to improving efficiency of production and facilitating international trade. Where international standards exist or their completion is imminent, therefore, the Code of Good Practice says that standardizing bodies should use them,

or the relevant parts of them, as a basis for standards they develop. It also aims at the harmonization of standards on as wide a basis as possible, encouraging all standardizing bodies to play as full a part as resources allow in the preparation of international standards by the relevant international bodies, including the ISO and IEC.

In the interest of transparency, the Code requires that standardizing bodies that have accepted its terms notify this fact to the joint ISO/IEC Information Centre located at the ISO Central Secretariat in Geneva, either directly or through the relevant national/international member of ISONET. At least once every six months, standardizing bodies must publish their work programmes and also notify the existence of their work programmes to the ISO/IEC Information Centre. Other important provisions relate to the preparation, adoption and application of standards.

The present Directory lists all standardizing bodies that had notified acceptance of the WTO TBT *Code of Good Practice for the Preparation, Adoption and Application of Standards* by 1 March 2005. The Directory also contains the addresses of these standardizing bodies and information related to the availability of their work programmes.

## How to use this Directory

Each entry in the WTO Standards Code Directory is presented in the following format:

<b><i>Name of the standardizing body</i></b>	
<b>Address</b>	Address of the standardizing body, including telephone, fax, telex, E-mail
<b>Type of standardizing body</b>	Whether a central government body, a local government body or a non-governmental body
<b>Scope</b>	Scope of current and expected standardization activities
<b>Publication</b>	Name and issue of the publication in which the work programme is published
<b>Period</b>	The period to which the work programme applies or the frequency of its updating
<b>Price</b>	The price (if any) of the work programme
<b>Contact</b>	How and where the work programme can be obtained

## **Standards Council of Canada (SCC)**

<b>Address</b>	270 Albert Street, Suite 200 CA-Ottawa, Ontario K1P 6N7  Tel. + 1 613 238 32 22 Fax + 1 613 569 78 08 E-mail <a href="mailto:info@scc.ca">info@scc.ca</a> Web <a href="http://www.scc.ca">www.scc.ca</a>
<b>Type of standardizing body</b>	Central government
<b>Scope</b>	The scope is unlimited. SCC approves National Standards of Canada (NSCs) in every subject area. SCC does not itself develop standards but accredits Standards Development Organizations (SDOs) which carry out standards development and submit candidate NCS's to SCC for approval. The following four SDOs are accredited by SCC: Bureau de normalisation du Quebec (BNQ), Canadian General Standards Board (CGSB), CSA International, Underwriters' Laboratories of Canada (ULC).
<b>Publication</b>	Work programmes of the accredited SDOs are available directly from each organization. Information on the accredited SDOs on whose behalf SCC notifies its acceptance of the <i>Code of Good Practice for the Preparation, Adoption and Application of Standards</i> is available on the SCC homepage at: <a href="http://www.scc.ca/about/sdoe.html">www.scc.ca/about/sdoe.html</a> . Those unable to access the information electronically, and those having specific questions about the SDOs may request information from the WTO TBT Enquiry Point for Canada at the contact address below.
<b>Period</b>	Constantly updated.
<b>Price</b>	—
